

MEGA CARBON 3-0-3

High Carbohydrate Fertilizer With Iron

GENERAL INFORMATION:

MEGA CARBON is a supplemental nitrogen, potassium, and iron fertilizer containing high levels of complex carbohydrates and plant proteins. **MEGA CARBON** is specifically designed to enhance color response and turf quality while increasing the biological activity of the root zone. Much research has been done correlating a healthy and diverse biological profile to root growth and overall plant health. With 38% sugars and 47% organic matter, **MEGA CARBON** is an excellent way to enhance root zone production while introducing very little fertilizer salts. **MEGA CARBON** is the environmentally friendly way of stimulating the root zone and increasing turf quality.

USE RATES:

Apply 3 - 6 ounces per 1,000 square feet every 10 to 14 days. Water in enough to rinse from the leaf blades to ensure product makes soil contact.

GUARANTEED ANALYSIS:

Total Nitrogen: 3.0%
 3.0% Urea Nitrogen
Soluble Potash: 3.0%
Iron (Fe): 2.5%

Derived from: urea, blackstrap molasses,
ferrous sulfate

***MEGA CARBON** is the environmentally friendly way of stimulating the root zone and increasing turf quality*
