

K-SHIELD 0-0-11

Potassium Silicate Fertilizer with Kelp and Humic Acid

GENERAL INFORMATION:

K-SHIELD 0-0-11 is specifically designed to enhance the physical strength of turf while increasing the resistance to stress. Silica acts throughout the plant to increase strength, wear resistance, drought resistance, and enhanced playing characteristics. Kelp extracts contain natural biostimulants which enhance plant vigor and stress responses. Humic acid increases cation exchange and enhances nutrient availability. With **K-SHIELD 0-0-11**, all of these compounds work in synergy to help enhance the durability and vigor of the turf stand despite conditions of stress.

USE RATES:

Apply 3 - 6 ounces per 1,000 square feet
biweekly or as needed.

GUARANTEED ANALYSIS:

Soluble Potash (K₂O) 11.0%

Derived from: potassium silicate, ascophylum
nodosum.

Also Contains Non-Plant Food Ingredients:

7.0% Silica

5% ... Humic Acid

*Use **K-SHIELD** to toughen turf while
enhancing stress resistance and increasing
nutrient availability.*
